

ULLRICH - ALUMINIUM FINISHES

HOT METAL[®]
DECORATIVE PANELS

HOT BY STEW METAL

Creative Metal Laminate

Introducing a revolutionary new metal laminate product called Hot Metal®! Unique in both its looks and application, Hot Metal® is the first aluminium laminate process in Australia/New Zealand that can produce a finish with a striking 3-D effect.

This product offers specialised metal laminate finishes which are created by coating the aluminium with transparent colours. The laminate is then textured to create a three dimensional effect using a range of handcrafted patterns.

Because you can choose a combination of colours and patterns, Hot Metal® offers you the ultimate in creative control.

Creative Designs

Hot Metal® gives architects and designers the benefit of a versatile, affordable and durable metal laminate, that can be used for virtually any application.

Made from light-weight aluminium, Hot Metal® can be fixed to any vertical surface. Because it is easily cut, the different patterns and colours can be combined creatively to achieve a stunning effect.

Standard sheet size is 2400mm x 1200mm (0.6mm thick). Hot Metal® offers vibrant colours and exciting patterns which when combined with good quality lighting creates stunning illusionary effects. Add extra dimension to interiors with powerful Hot Metal® colours, patterns and strategic light.

Hot Metal® is constantly researching and developing new colours, designs and applications.

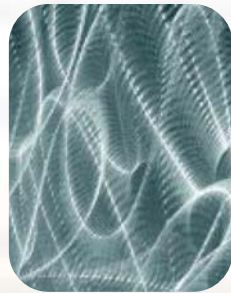

Colours and Patterns

Hot Metal® offers impact with eye-catching intense colours which can be creatively combined with a choice of handcrafted 3-D patterns. The result is a contemporary, striking and powerful effect, which brings every design and application to life.

Hot Metal® patterns express a multi-dimensional effect
